- Gold Medal - 2014 Los Angeles International Wine Competition
- Bronze Medal – 2015 IWC Junmai category

- Junmai Sake is made from only rice, water, koji, and yeast. Of these, rice and water are the 2 key ingredients.
- Imayo Tsukasa's commitment to only brewing Junmai Sake means being selective about the rice and water.
- This Junmai sake pays tribute to the artesian water sourced from the Suganadake mountain, famous for its abundant and extremely soft and pure water. The result is a clean and pure sake with ample savory character that enhances umami rich food from sushi and sashimi to braised meats.
